DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to the measuring of the 4th reaction well with respect to the first, second, and third reaction wells. Does cellular performance of the fourth well get compared to the first, second, and third well or are the first, second, and third, well combined to study cellular performance?

Claims 10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 depends on claim 7 which already claims measuring the cellular performance. Examiner recommends either amending claim 7 to include "cellular performance as claimed in listed 1" or deleting claim 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-11 are rejected under 35 U.S.C. 102(e) as being anticipated by

Bahnson (2003/0017522)

Art Unit: 1743

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claims **3-11** are rejected under 35 U.S.C. 102(e) as being anticipated by Bahnson (PUB No. 2003/0017522 A1).

See last Office action for rejection.

Claims **4-9** and **11** are rejected under 35 U.S.C. 102(b) as being anticipated by Greenberger et al. (USPN 6,008,010).

Greenberger discloses a method for analyzing a cell or cells. Greenberger monitors the cells while they are in a controlled closed environment where images are taken using visible and fluorescent lights allowing a computer to overlay the pictures and provide a 3d motion of the cells while they are splitting (col 22, lines 18-26, 47-60, col. 23, lines 1-7, 21-25). Greenberger also allows for kinetic information to be gathered and applied to the analysis of cell splitting (col. 17, lines 5-36).
